

| Stage                     | User Goal                           | User Actions                                                       | Thoughts & Feelings                         | Pain Points                       | Opportunities                                |
|---------------------------|-------------------------------------|--------------------------------------------------------------------|---------------------------------------------|-----------------------------------|----------------------------------------------|
| <b>Discover</b>           | Find an easy way to manage expenses | Searches for an expense tracker and installs FinTrack              | "I need a simple app to track my spending." | Too many complicated finance apps | Highlight simplicity and quick setup         |
| <b>Sign Up / Login</b>    | Access the app                      | Creates an account or logs in                                      | "This should be fast and secure."           | Lengthy registration process      | Offer quick sign-up with minimal fields      |
| <b>Dashboard</b>          | Get an overview of finances         | Views balance, income, and expenses                                | "I can see where my money stands."          | Information overload              | Display only key metrics with a clean layout |
| <b>Add Expense</b>        | Record a new expense                | Taps "Add Expense," enters amount, category, and notes, then saves | "I hope this takes only a few seconds."     | Too many form fields              | Keep the form short and easy to complete     |
| <b>Review Spending</b>    | Understand spending habits          | Opens reports and charts                                           | "Where am I spending the most?"             | Hard-to-read reports              | Use clear charts and category summaries      |
| <b>Manage Budget</b>      | Stay within budget                  | Checks remaining budget and receives alerts                        | "I need to avoid overspending."             | Forgetting spending limits        | Send reminders and budget notifications      |
| <b>Continue Using App</b> | Build a long-term habit             | Uses the app daily to log expenses                                 | "This makes managing money easier."         | Forgetting to log expenses        | Add reminders and quick-entry shortcuts      |
