

FinTrack – Smart Personal Finance & Expense Tracking App

UI/UX Case Study

1. Problem Statement

Managing daily expenses manually can be difficult. Many users struggle to track spending habits, monitor monthly budgets, and understand where their money is going. The goal of FinTrack is to provide a simple and user-friendly mobile application that helps users record expenses, analyze spending patterns, and manage their finances efficiently.

2. Target Users

- College students managing personal expenses
 - Working professionals tracking monthly budgets
 - Individuals looking to improve financial planning
 - Users who want quick insights into spending habits
-

3. User Flow

Splash Screen

Login / Sign Up

Dashboard

Dashboard Updated

Navigation Flow

1. User opens the application.
 2. Splash screen introduces the FinTrack brand.
 3. User logs in or creates a new account.
 4. Dashboard displays current monthly expenses and spending categories.
 5. User can add a new expense by entering:
 - Amount
 - Category
 - Date
 6. Analytics screen visualizes expense data using charts.
 7. Profile screen allows viewing and updating account details.
-

4. Screen Descriptions

Splash Screen

Purpose:

- Establish brand identity.
- Provide loading state before entering the application.

Key Elements:

- FinTrack logo
 - App name
 - Loading indicator
-

Login & Sign Up Screens

Purpose:

- Secure user authentication.
- Allow new users to register.

Key Elements:

- Email field
- Password field
- Create account option
- Login button

Design Decision:

- Minimal layout to reduce user distraction.
 - Large input fields improve accessibility.
-

Dashboard Screen

Purpose:

- Provide an overview of spending activity.

Key Elements:

- Monthly expense card
- Top spending categories
- Analytics shortcut
- Add Expense button

Design Decision:

- Important financial information placed at the top.
 - Frequently used actions are easy to access.
-

Add Expense Screen

Purpose:

- Record a new transaction.

Key Elements:

- Amount field
- Category selection
- Date picker
- Save Expense button

Design Decision:

- Simple form layout minimizes data-entry effort.
 - Large category buttons improve usability.
-

Analytics Screen

Purpose:

- Help users understand spending behavior.

Key Elements:

- Pie chart for category-wise expense distribution
- Monthly trend graph
- Percentage breakdown by category

Design Decision:

- Visual charts improve understanding of financial data.
 - Category percentages help identify major spending areas.
-

Profile & Settings Screen

Purpose:

- Manage account information.

Key Elements:

- User profile information
- Email address
- Monthly budget details
- Logout button

Design Decision:

- Organized card layout improves readability.
 - Important account information remains accessible.
-

5. Design Decisions

Color Palette

Primary Color:

- Soft Green (#7DA36F)

Reason:

- Green is associated with money, growth, savings, and financial stability.

Typography

- Large headings for clear hierarchy.
- Simple readable fonts for accessibility.

Cards & Shadows

- Rounded corners create a modern appearance.
- Shadows improve visual depth and distinguish interactive components.

Consistency

- Uniform spacing across screens.
- Consistent button styles and form elements.

- Repeated color scheme strengthens brand identity.
-

6. Outcome

The FinTrack mobile application provides users with a simple and efficient way to:

- Track expenses
- Monitor spending habits
- View financial analytics
- Manage personal budgets

The final design focuses on usability, simplicity, and clear financial visualization, making expense management easier for everyday users.
