

UI/UX Design Internship – Task 3

Project: FinTrack – Smart Personal Finance & Expense Tracking App

Objective

Design a complete high-fidelity user interface from approved wireframes and connect the screens using an interactive prototype. The focus was on creating an intuitive, visually appealing, and consistent user experience.

Design Process

1. Reviewed wireframes from Task 2.
2. Selected a modern color palette and typography.
3. Designed high-fidelity screens in Figma.
4. Added icons, spacing, and reusable components.
5. Created interactive prototype with navigation.
6. Tested user flow and refined the interface.

Screens Designed

- Login
- Sign Up
- Dashboard
- Analytics
- Add Expense
- Profile

Prototype & Design Summary

Prototype Features

- Clickable navigation between screens.
- Smooth user flow from authentication to expense management.
- Consistent visual hierarchy and layout.
- Mobile-first design approach.

Design System

Colors: Modern blue/green theme with neutral backgrounds.

Typography: Clean sans-serif font with consistent hierarchy.

Components: Buttons, input fields, cards, charts, bottom navigation, icons.

Tools Used

Figma for UI design and prototyping.

GitHub for project submission and version control.

Learning Outcomes

This task improved skills in visual design, component consistency, prototyping, user-centered design, spacing, typography, and preparing a complete UI/UX project for presentation.

Conclusion

The Task 3 deliverable successfully transforms the wireframes into a polished, interactive mobile application prototype. The final design provides a clean, modern, and user-friendly experience while maintaining consistency across all screens.
